

RNTCP Performance Report, India

Third Quarter, 2003

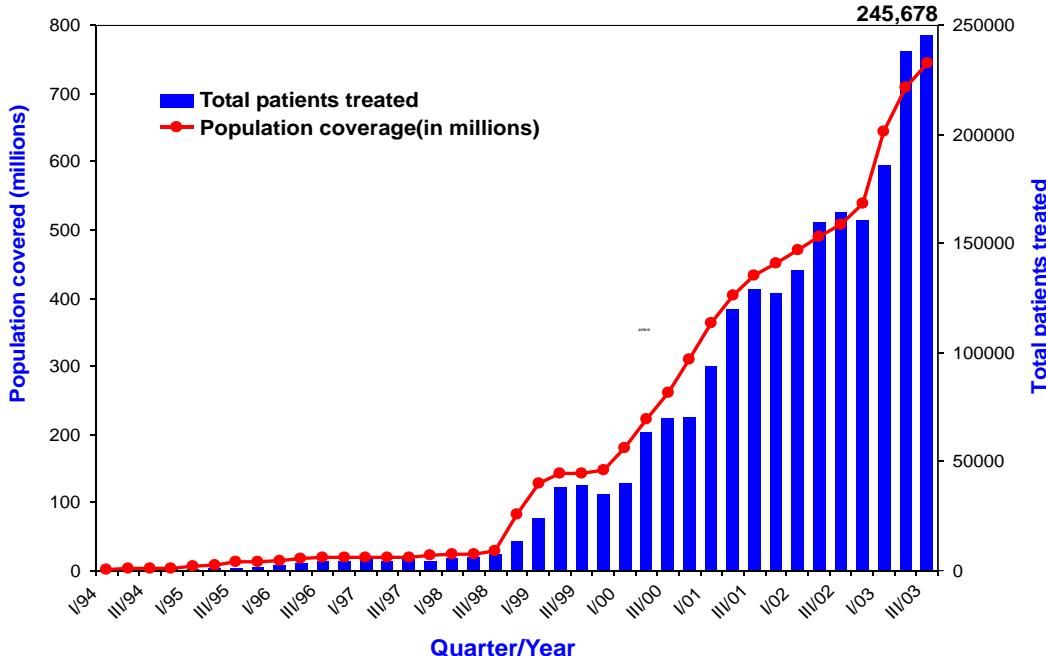

District-wise RNTCP implementation status

Type of districts / reporting units	No. of districts / reporting units	Population as per 2001 Census	Projected population (in million) *
Implementing	403	716	744
Appraisal done	17	24	25
Ready for appraisal	6	10	10
Preparing	203	277	290

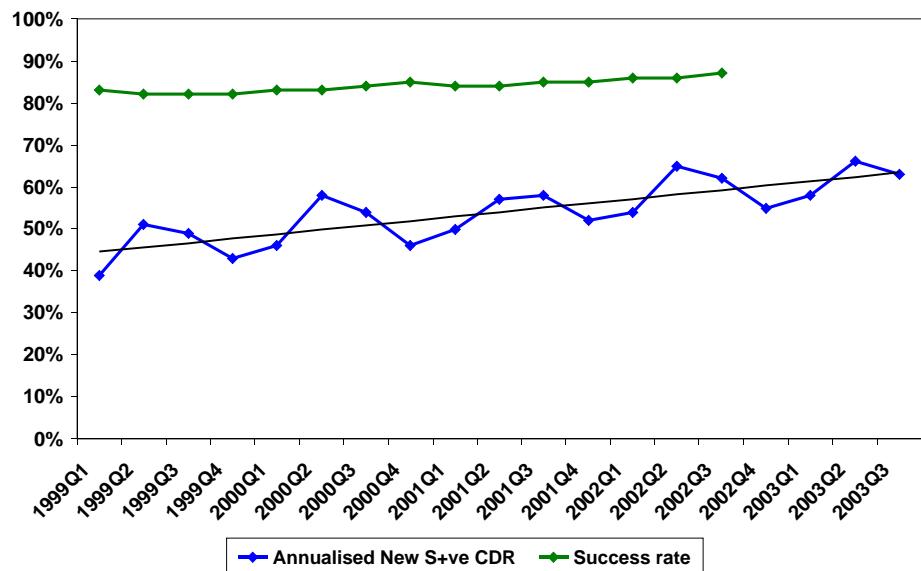

* 2003 projected population based on 2001 census.

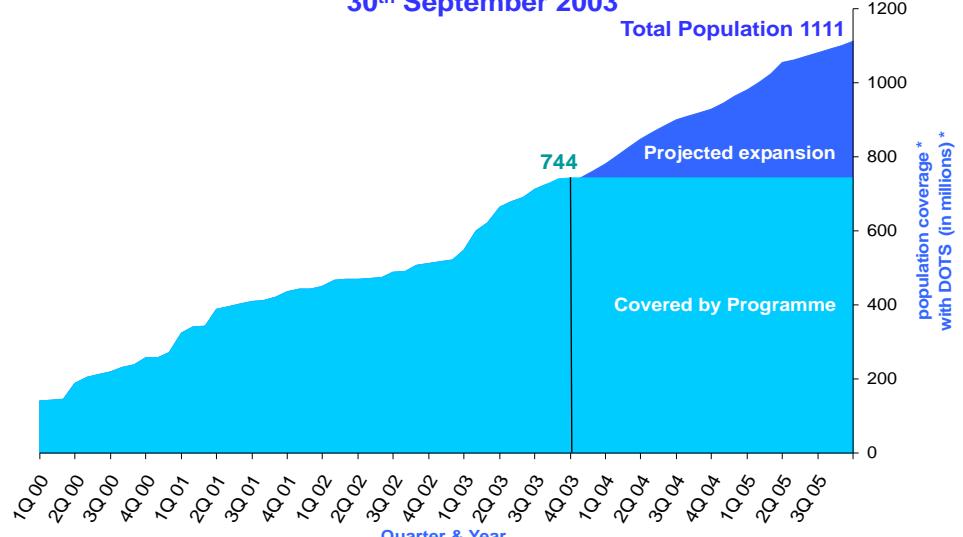

Population in India covered under DOTS and total tuberculosis patients put on treatment each quarter *

India: Annualized new smear positive case detection rate and success rate, 1st quarter 1999 to 3rd quarter 2003 *

Multiyear DOTS expansion plan for India * 30th September 2003

* All figures and data in this report use standard GOI Census Bureau methodology to project the population. Population is projected from 2001 census.

Achievements in DOTS Expansion during the 3rd Quarter 2003

Dear Colleagues,

As a result of all of your considerable contributions to TB control in India, we have achieved a number of significant accomplishments during 3rd Qtr 2003:

Expansion of RNTCP

By September 2003 the coverage has increased from 712 million in June 2003 to 744 million population (71% of India's population) - an addition of 32 million in three months. DOTS services are now available to people in 403 districts of 26 States and Union Territories.

Performance

Patients are benefiting from the Programme. The case detection rate of new smear positive for this quarter is 63% and 2,45,678 patients were put on treatment. The success rate continues to be high and 87% of the new smear positives registered in 3rd quarter 2002 was successfully treated under DOTS. The smear conversion rate and cure among the new sputum positives was 89% and 86%, respectively.

Capacity building of states in monitoring & supervision.

To strengthen state capacity in monitoring and supervision, state TB cells are being trained and encouraged to analyze the performance data each quarter. To date, 15 States have started to analyze district quarterly performance reports and send regular feed back to highlight strengths and weakness for corrective action.

RNTCP-WHO Joint Monitoring Mission:

The review of the RNTCP was conducted from 15- 26 September 2003 by a team of 20 national and 22 international tuberculosis experts. The team made field visit to 5 states (viz. Maharashtra, Orissa, Rajasthan, Tamilnadu, and Uttar Pradesh). The team reviewed the programme at central level, visited more than 70 health facilities in 20 districts, interviewed administrators, health staff, TB patients, community members, and reviewed the records of more than 10,000 patients.

The key findings of the mission included: i) rapid expansion of DOTS and 5 fold increase from 135 million in the year 2000 to 740 million at the time of review, ii) RNTCP as highly economical costing less than Rupees 2 per capita, iii) good infrastructure and management system for TB control, iv) increased detection and cure rates, and v) overall excellent reporting and recording system.

The Joint Monitoring Mission also pointed out areas that need strengthening. These are: i) strengthening of staff position at central and state level, ii) strengthening of managerial capacity for planning, implementation, supervision, monitoring and financial management at state level iii) setting up of efficient system for flow of funds from state to the districts, iv) ensuring sufficient buffer stock for the drugs, v) greater involvement of private sector, and vi) filling up the vacancies of contractual staff.

Important forthcoming Event

2nd Stop TB Partners Forum

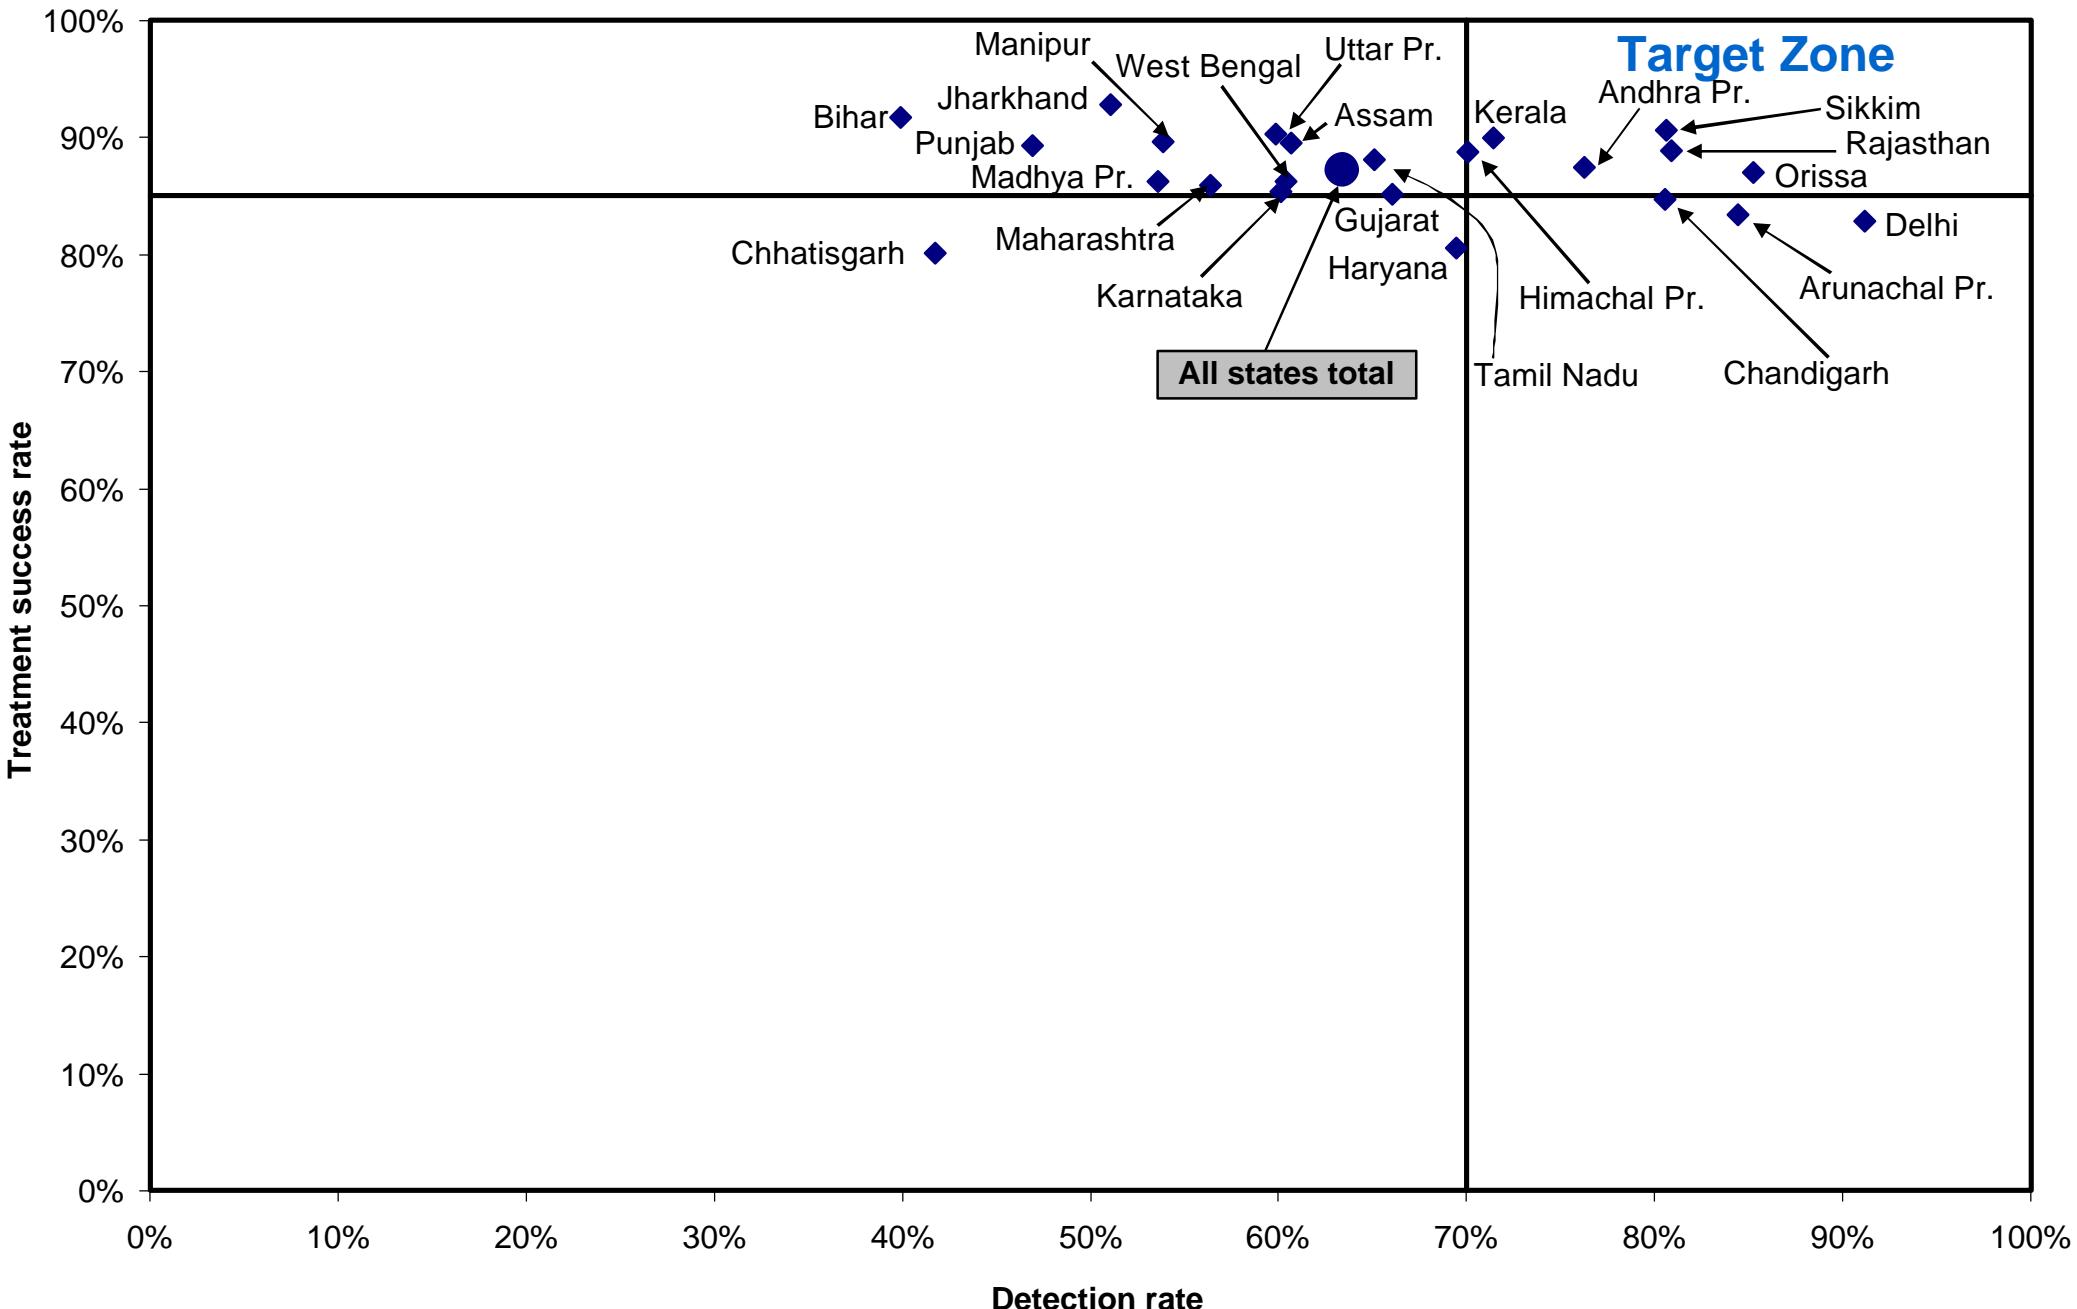

Stop TB Initiatives in collaboration with Ministry of Health and Family Welfare, Government of India has planned to host 2nd Stop TB Forum in New Delhi on 24-26th March 2004. Delegations of Ministers of Health/Finance from 22 high TB burden countries, high level representatives of Stop TB Partners and many special invitees from various regions are likely to participate in this event.

This meeting was scheduled to be held in December 2003 but in view of the launching of the '3 x 5' initiative on the occasion of this year's World AIDS Day – the biggest ever initiative to fight this dreaded disease, it was postponed to 24-26 March 2003, as the TB community wishes to fully support what promises to form a major part of the answer to fighting TB in AIDS endemic areas.

The performance of the programme in this quarter and the findings of the Joint Monitoring Mission are very encouraging. There has been continuous progress in the case detection and cure rates. RNTCP is progressing well and every effort is being made at the central, state and district level to keep up the performance of the programme by all those involved in RNTCP. However, we must also not forget that there are many challenges that need to be addressed through joint efforts of staff at all levels of implementation. We can overcome these challenges through regular monitoring and supervision and increased collaboration with other sectors.

Dr. L. S Chauhan, DDG (TB)
Directorate General of Health Services, MOHFW

Case-detection and treatment success rates in RNTCP areas for third quarter 2003/2002

NR - Not reported till 10th Nov 2003; Values for grey areas are not expected

* Projected population based on census population of 2001 is used for calculation of case-detection rate. 1 lakh = 100,000 population

† Annualized case detection rate totals based on districts implementing for more than one quarter. Estimated total new smear-positive cases adjusted for available data on Annual Risk of Infection (ARI)

§ Smear conversion rate not expected for districts that began implementing RNTCP during 3rd quarter 2003

¶ Cure rate and success rate are not expected for states that began implementing RNTCP after 3rd quarter of 2002

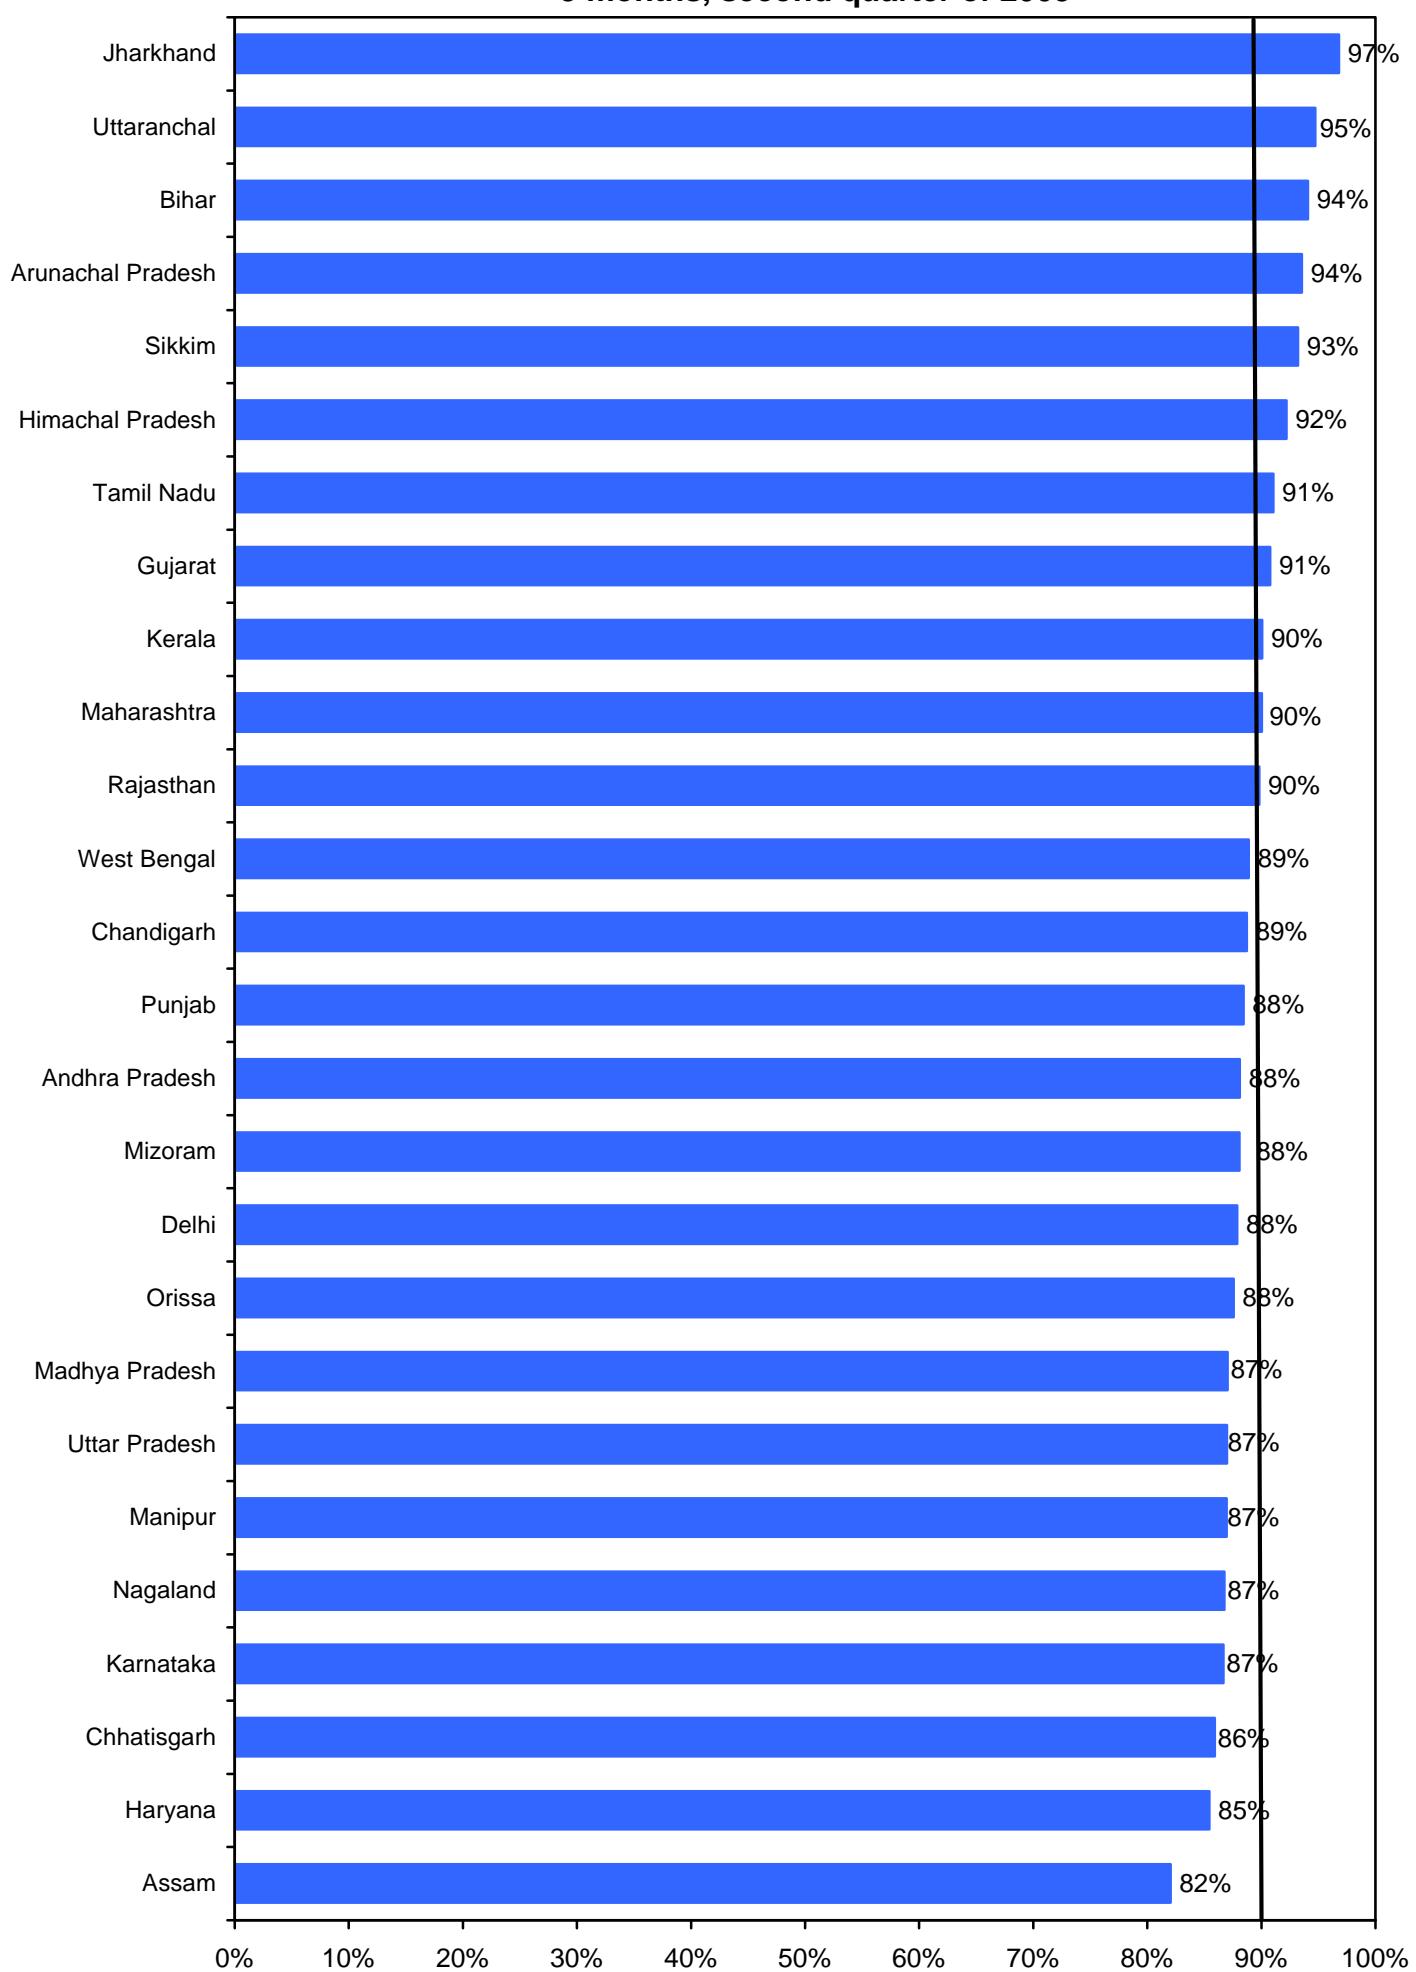

**Percentage of annual estimated new smear-positive cases detected,
third quarter of 2003**

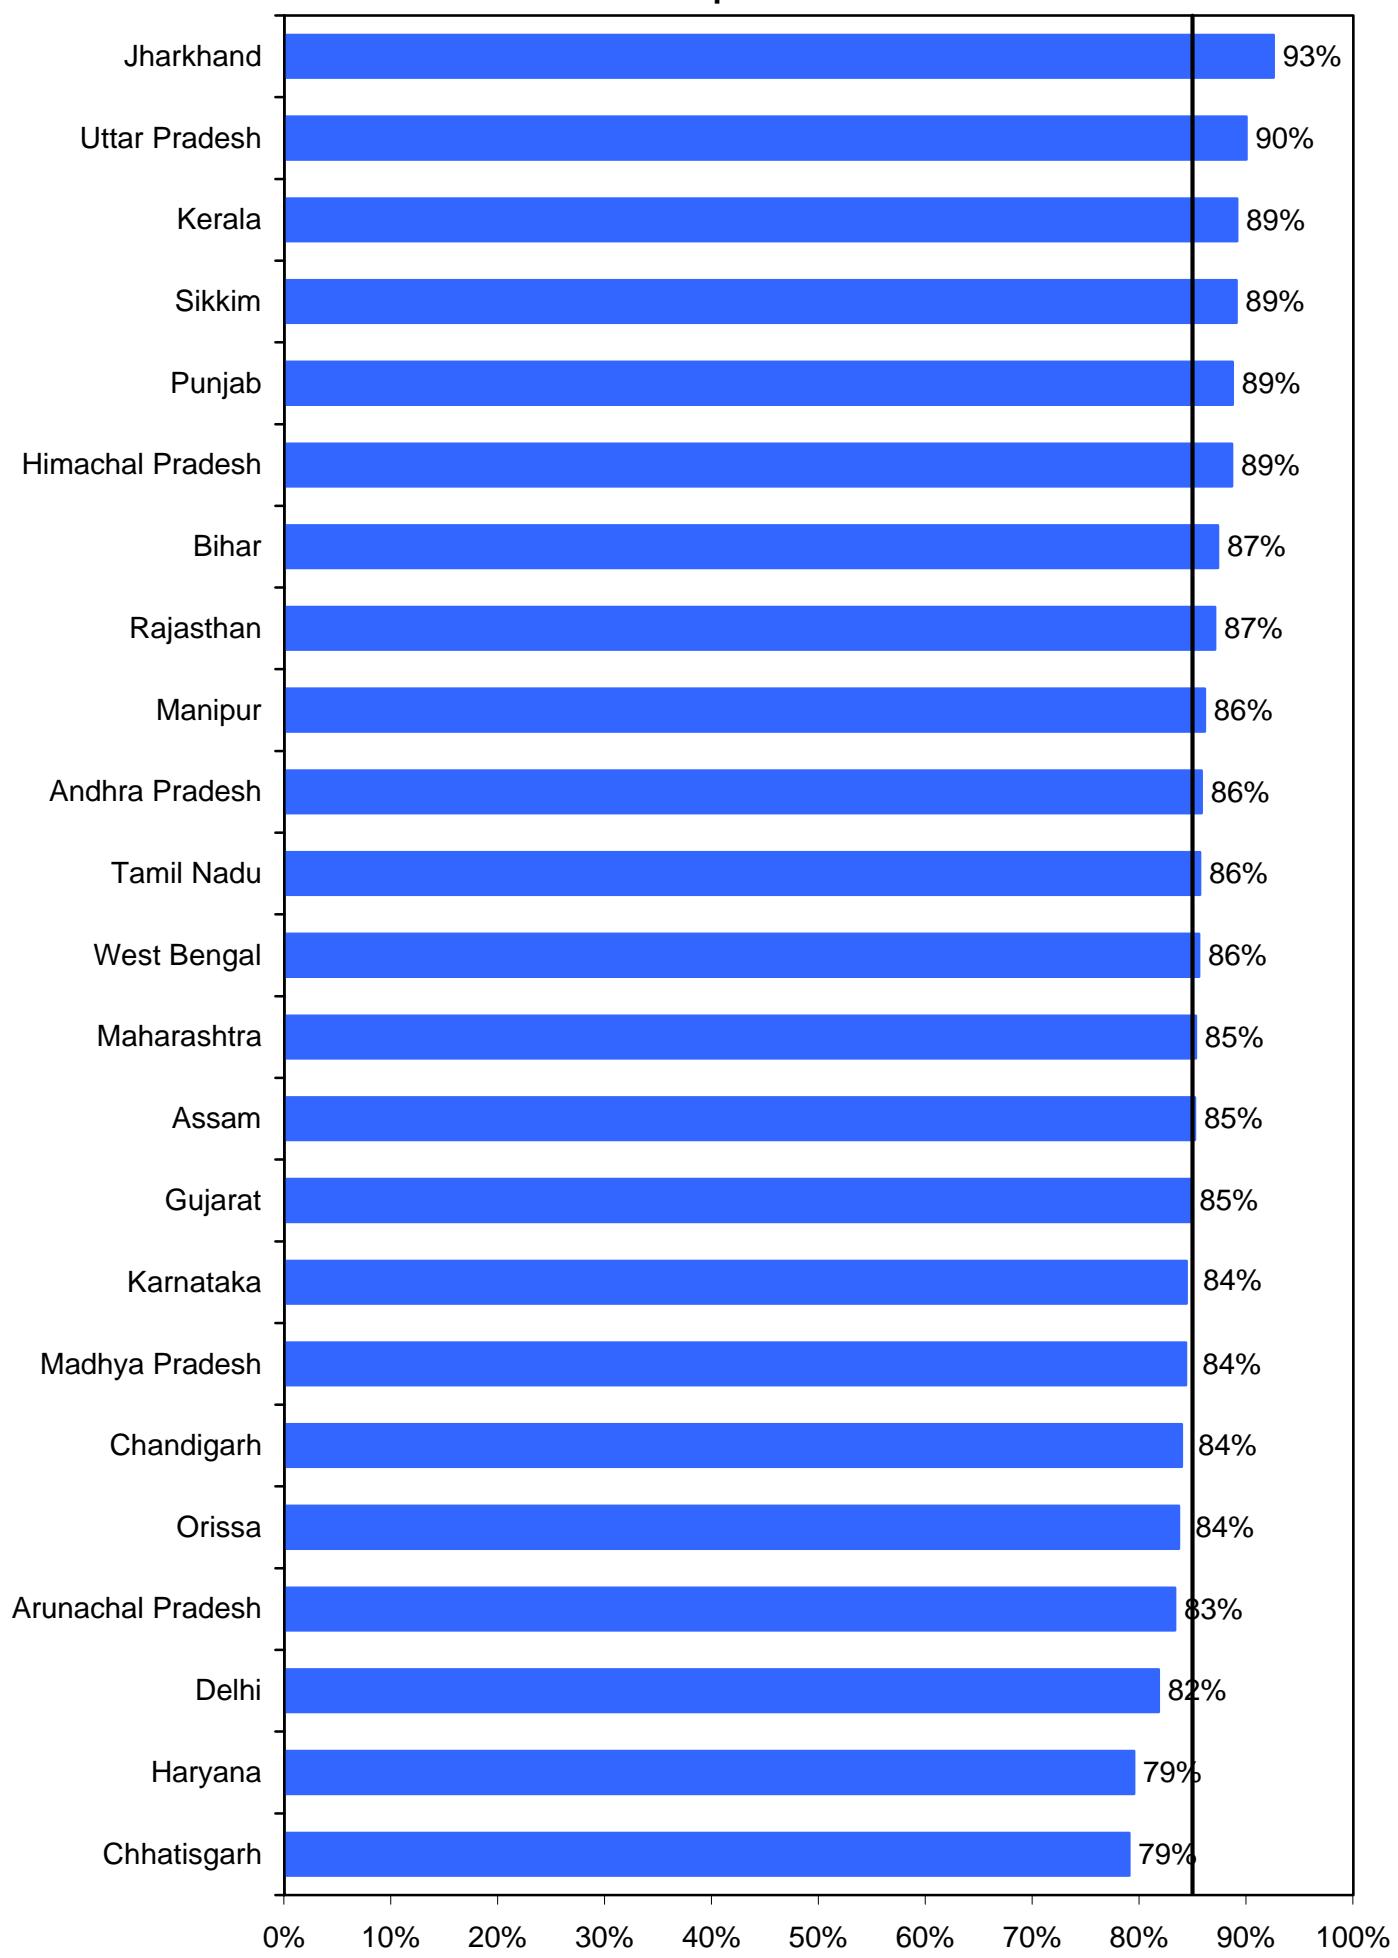

**Ratio of new sputum-negative to new sputum-positive patients,
third quarter of 2003**

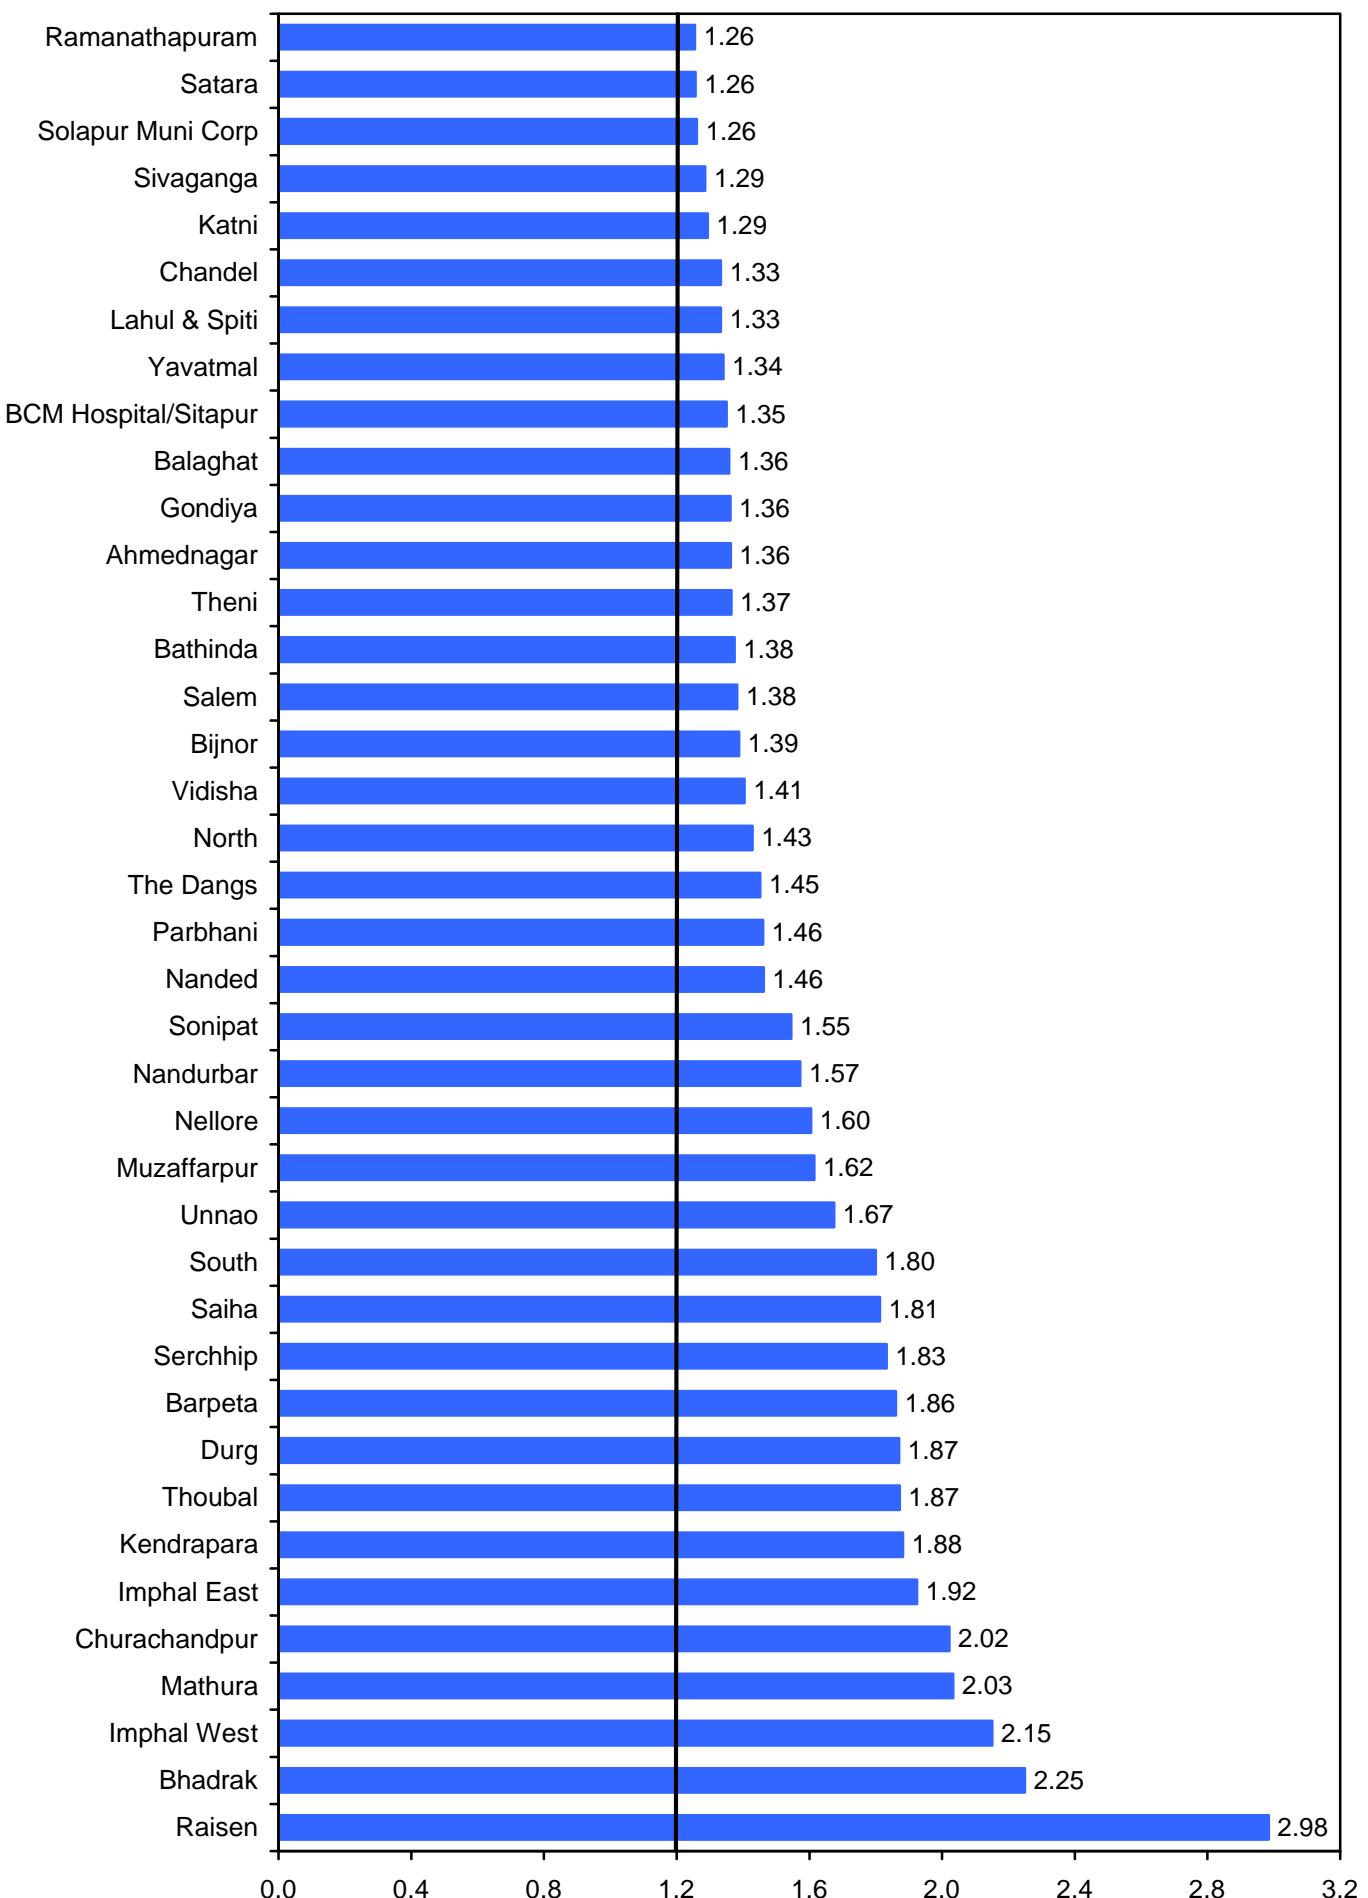

**Sputum conversion rate among new sputum-positive patients at
3 months, second quarter of 2003**

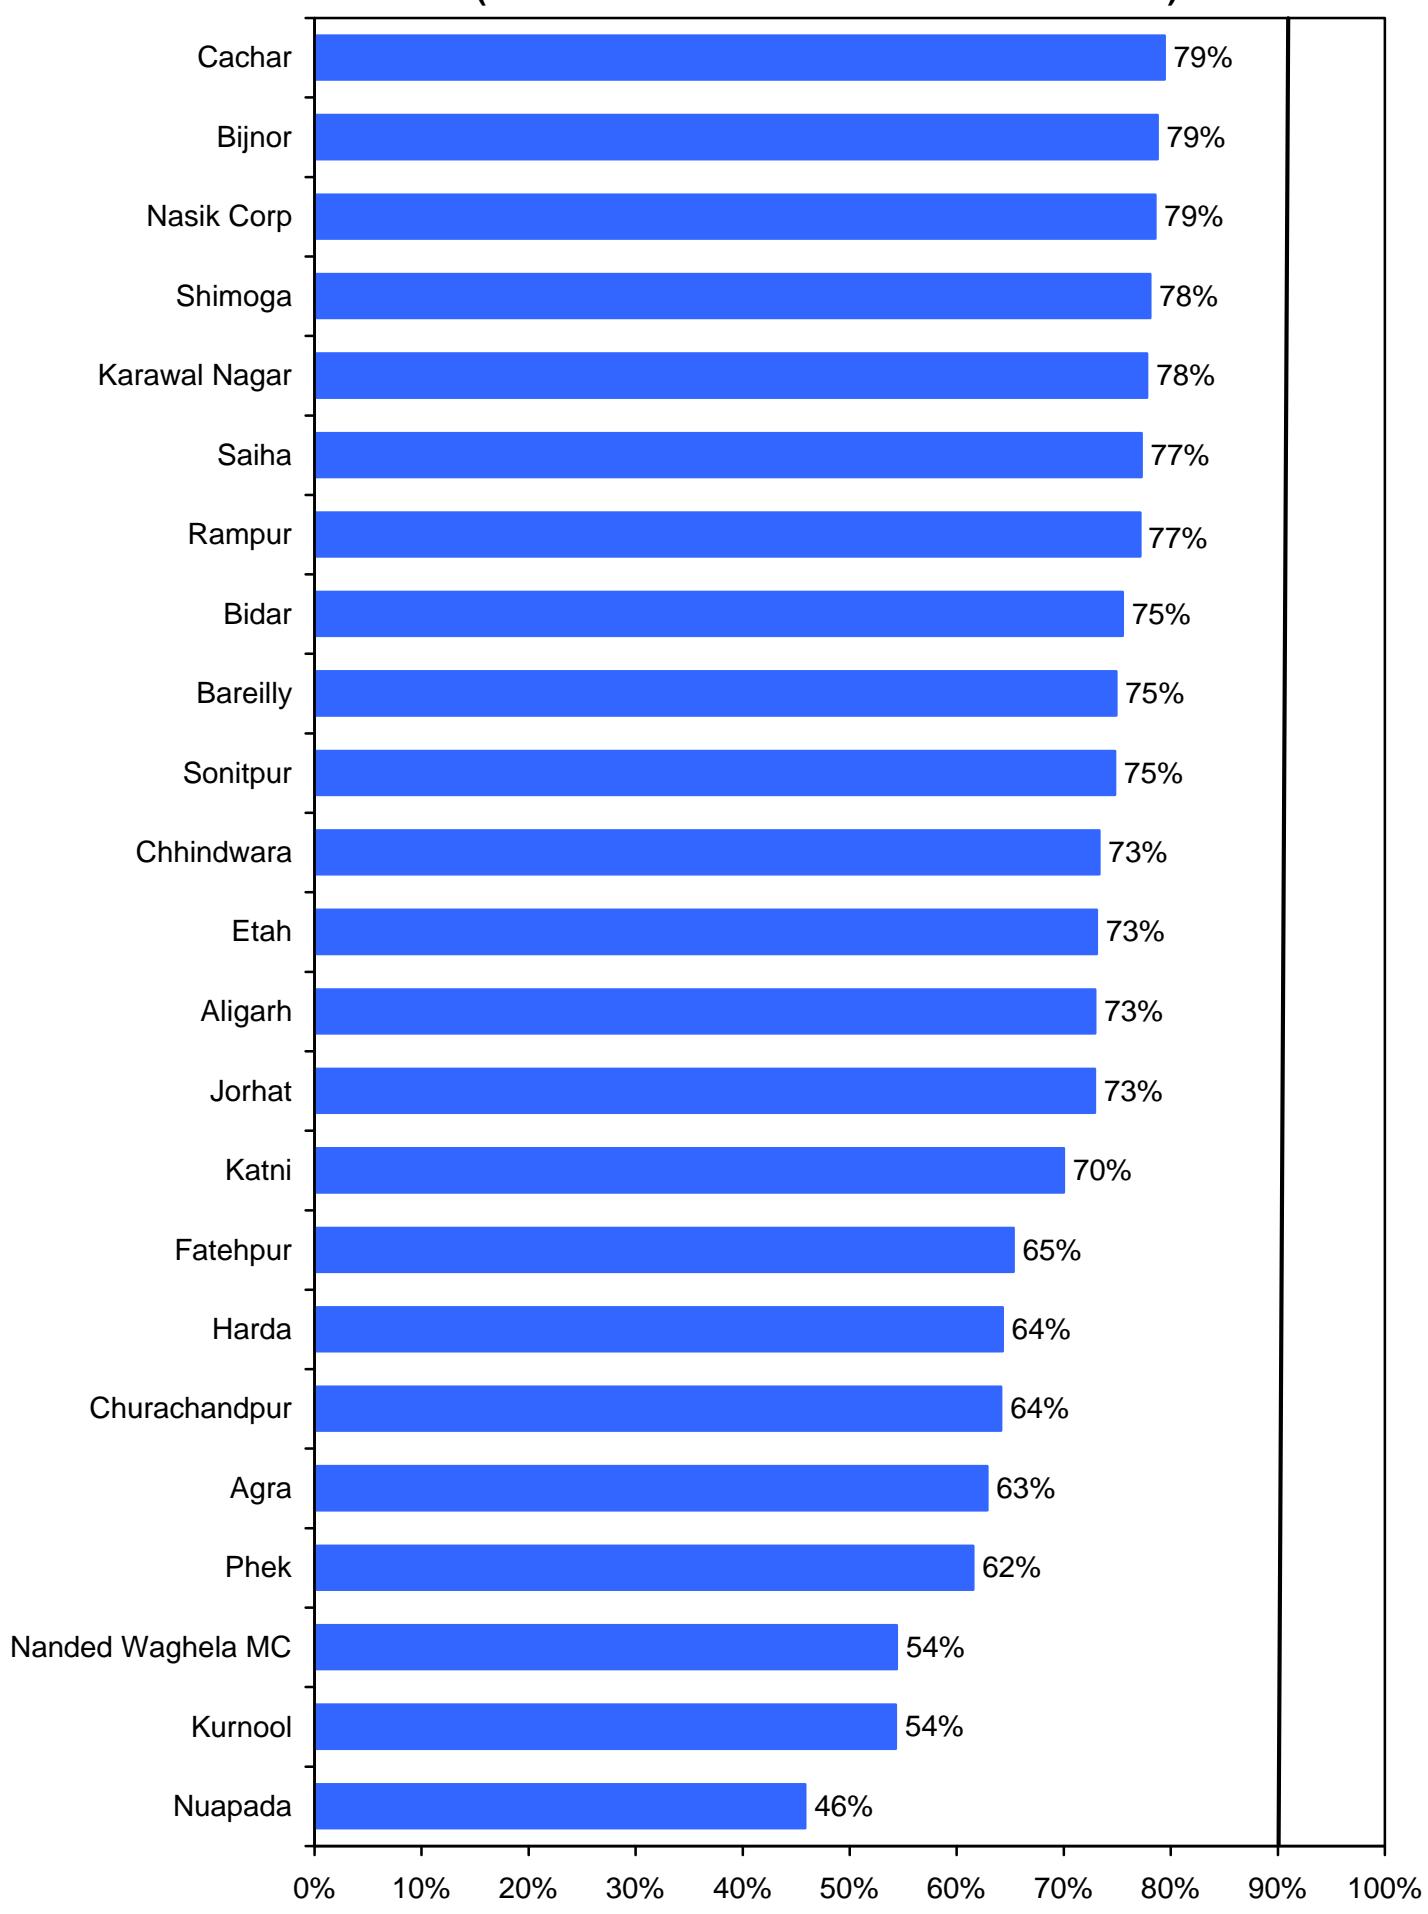

**Cure rate among new sputum-positive patients,
third quarter of 2002**

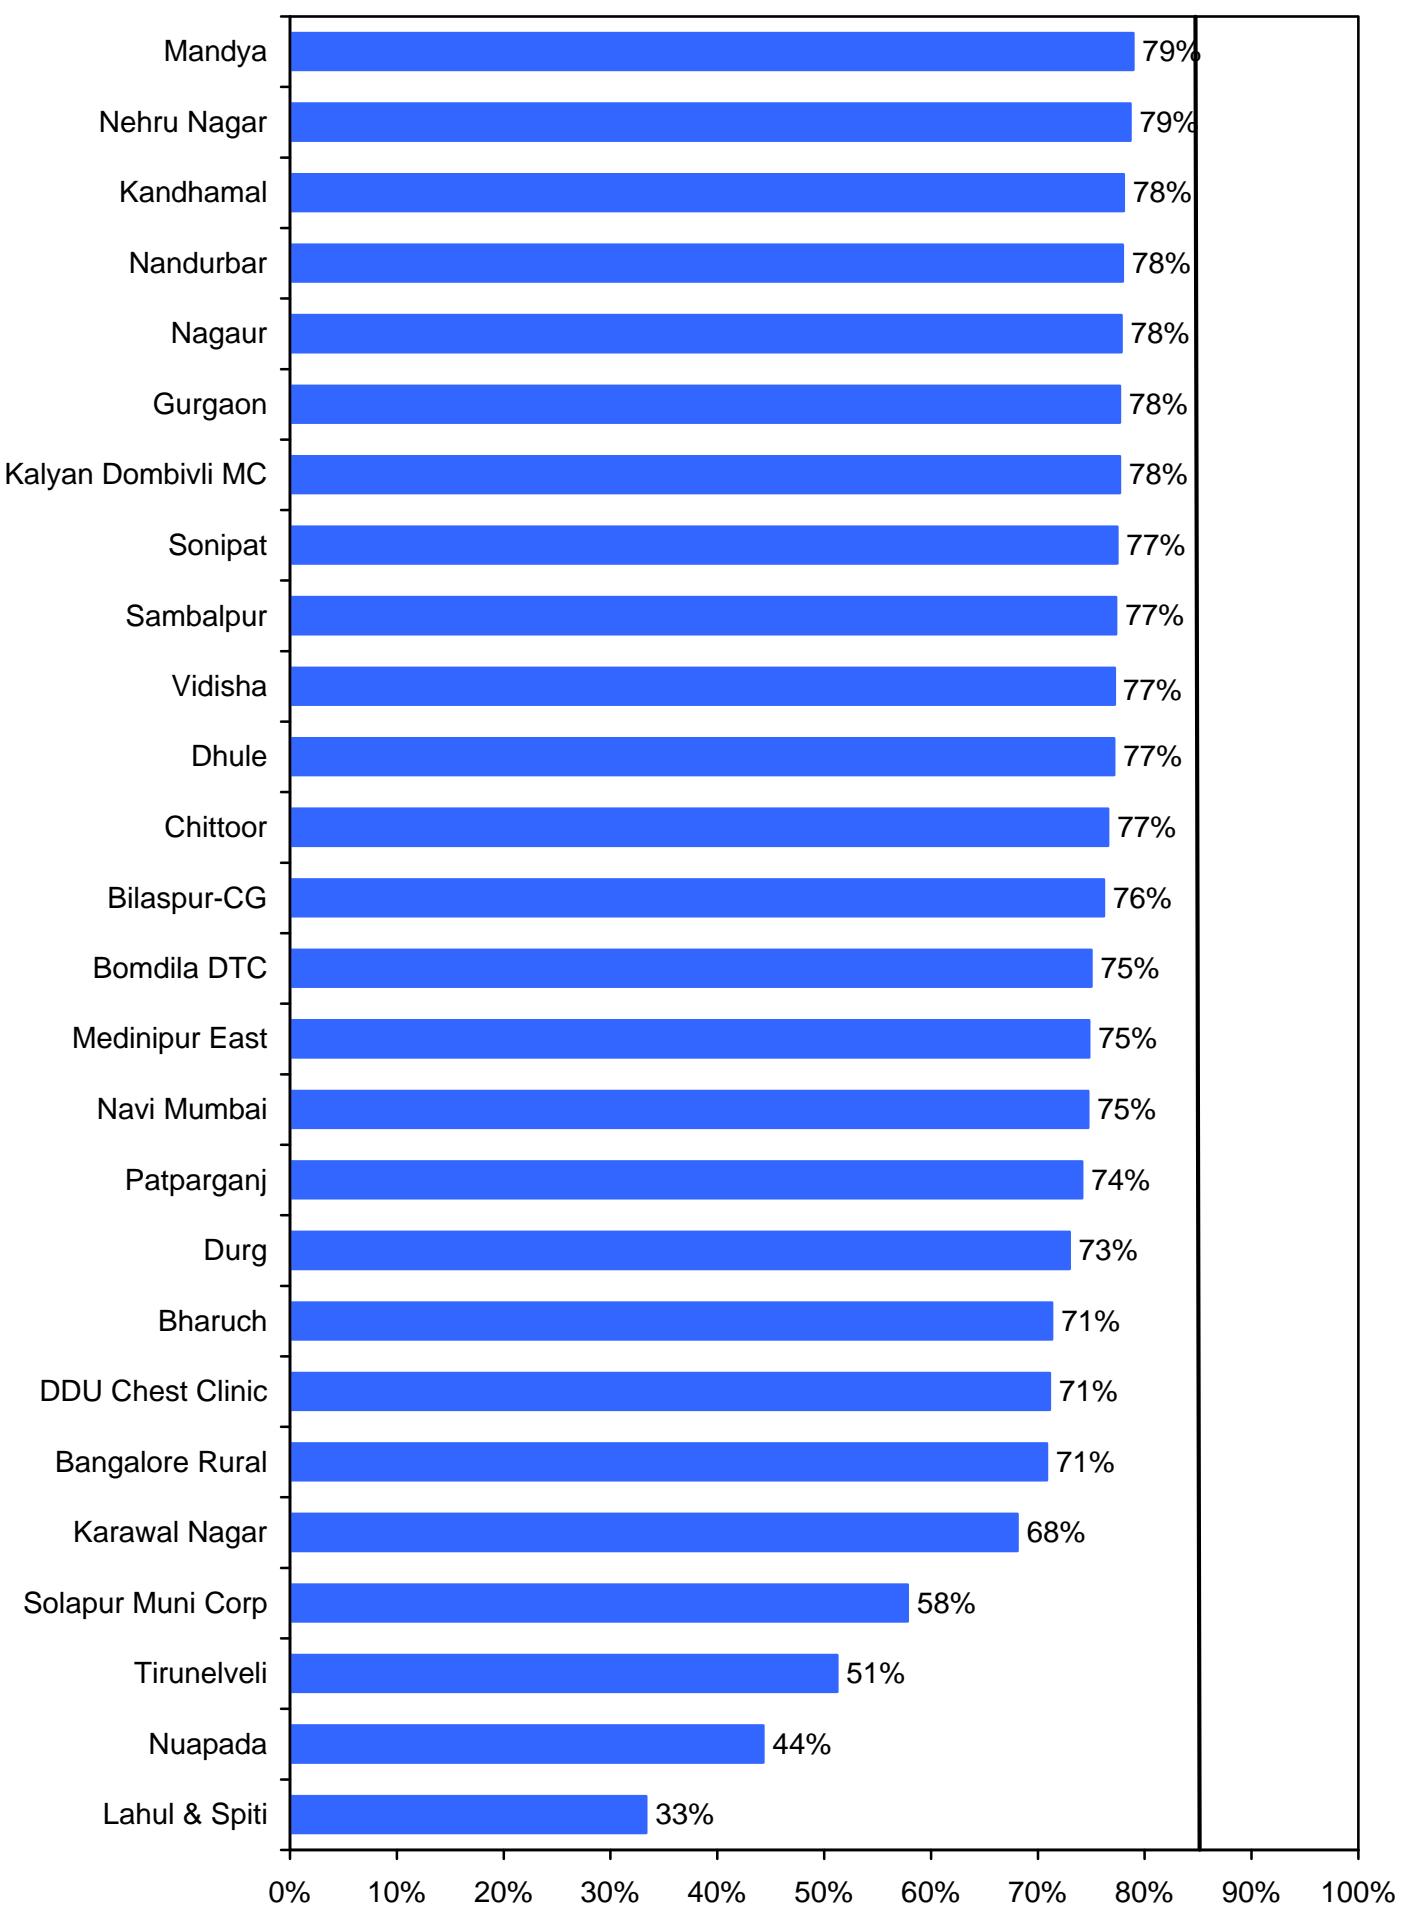

**Thirty-nine (10%) districts with a high ratio of new sputum-negative to new sputum-positive patients, third quarter of 2003
(all other districts had a ratio ≤ 1.2)**

**Twenty three (6%) districts with low sputum conversion rate among new sputum-positive patients at 3 months, second quarter of 2003
(all other districts had conversion rates >80%)**

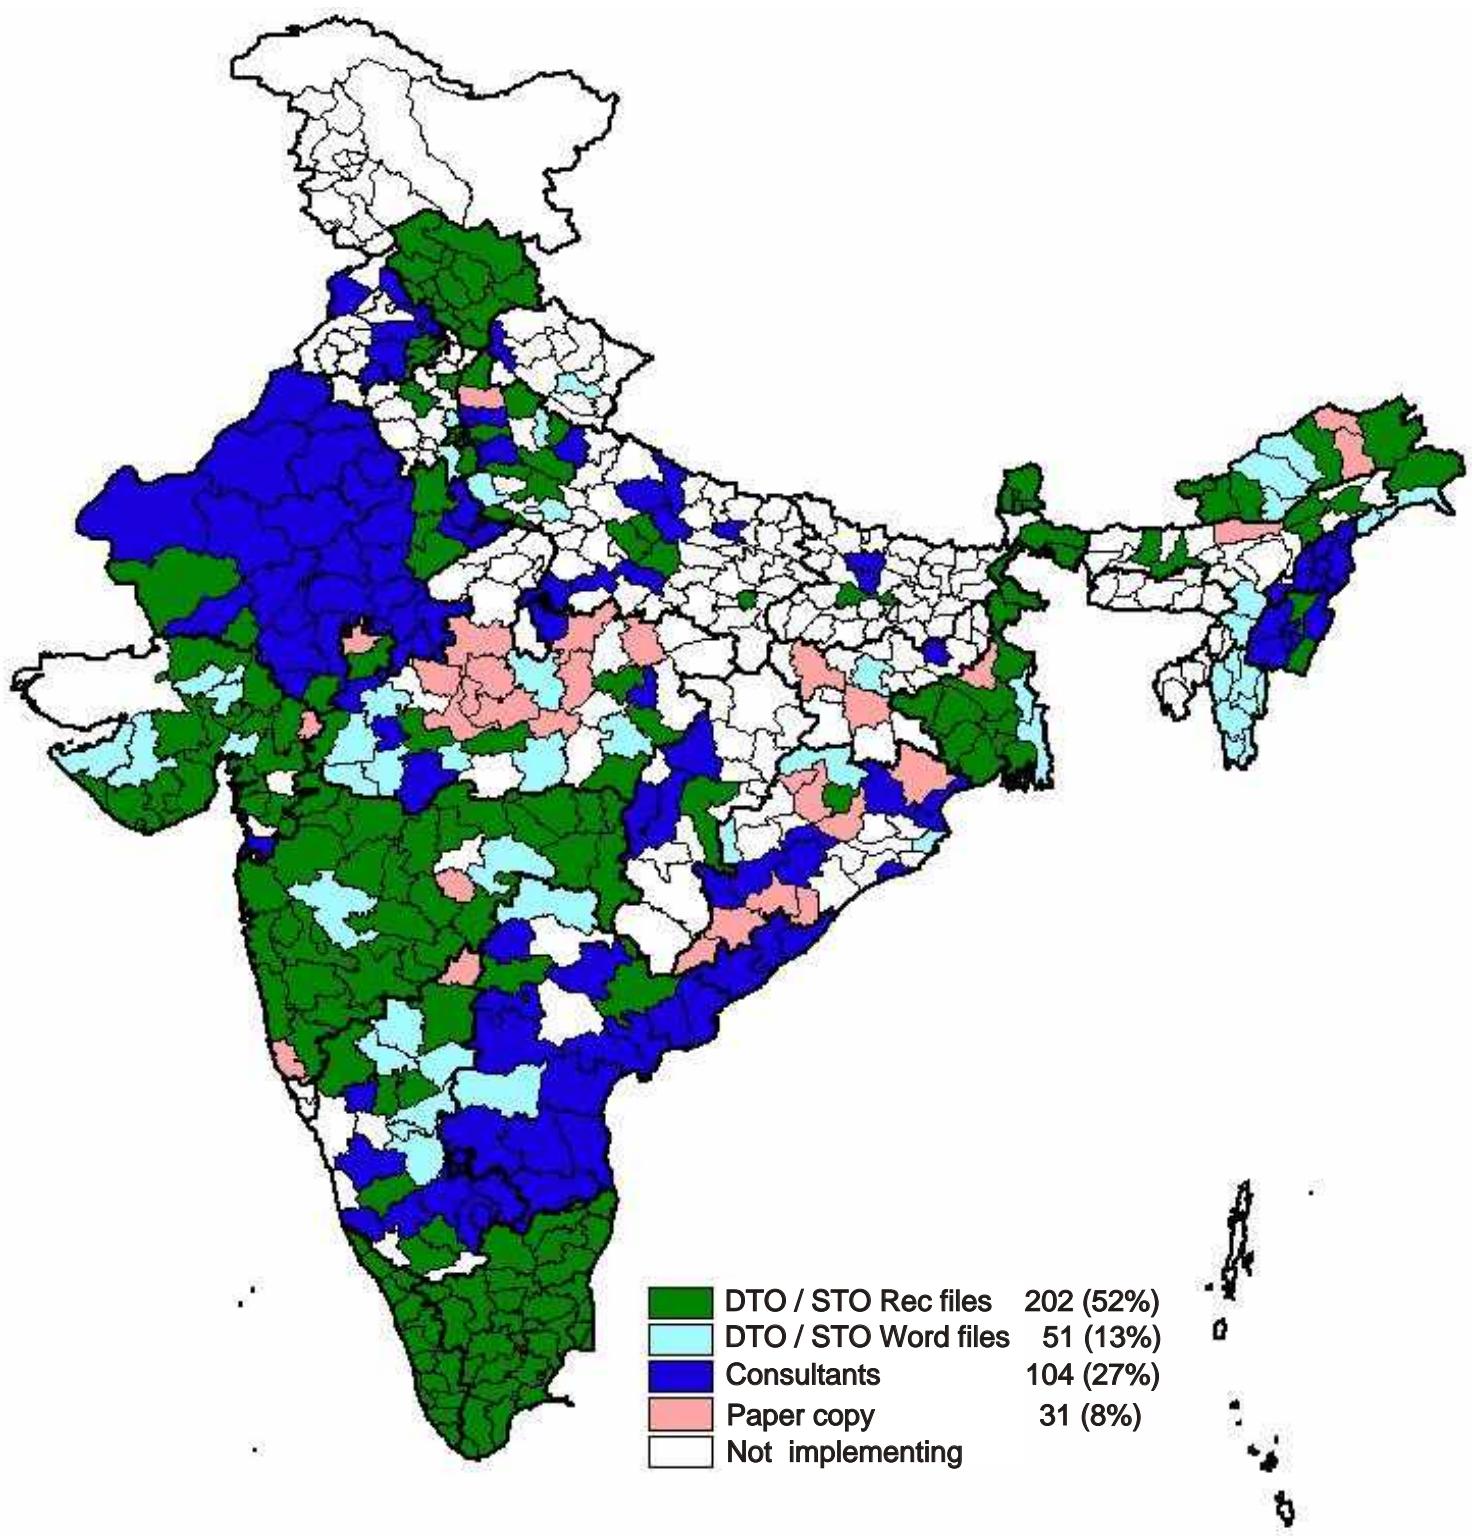

Twenty-six (7%) districts with low cure rates among new sputum-positive patients, third quarter of 2002 (all other districts had cure rates > 80%)

Status of electronic submission of quarterly reports, India

Third quarter, 2003

Cure rate by district, India

Third quarter, 2002
