

RNTCP Performance Report, India Fourth Quarter, 2004

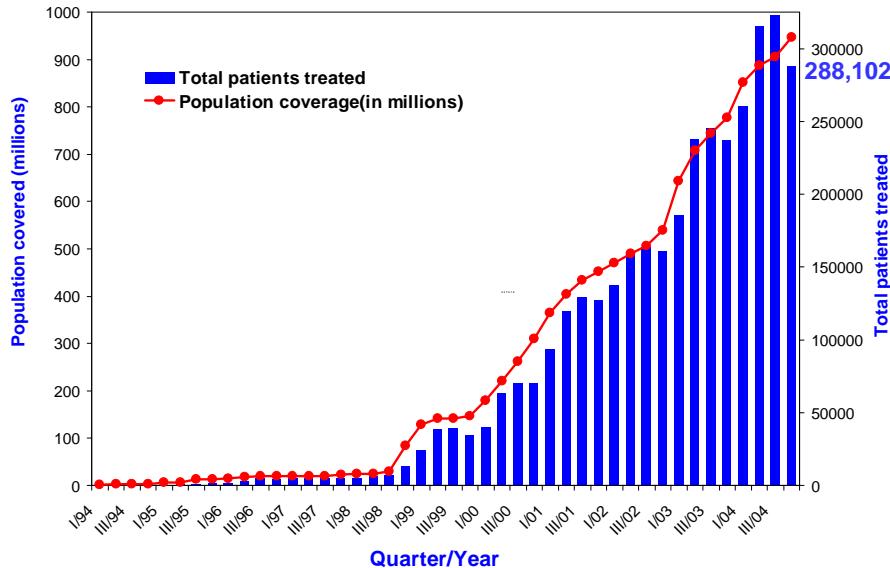

District-wise RNTCP Implementation status

Type of districts / reporting units	No. of districts / reporting units	Projected population (in million) *
Implementing	547	947
Appraisal done	15	25
Ready for appraisal	11	17
Preparing	59	100

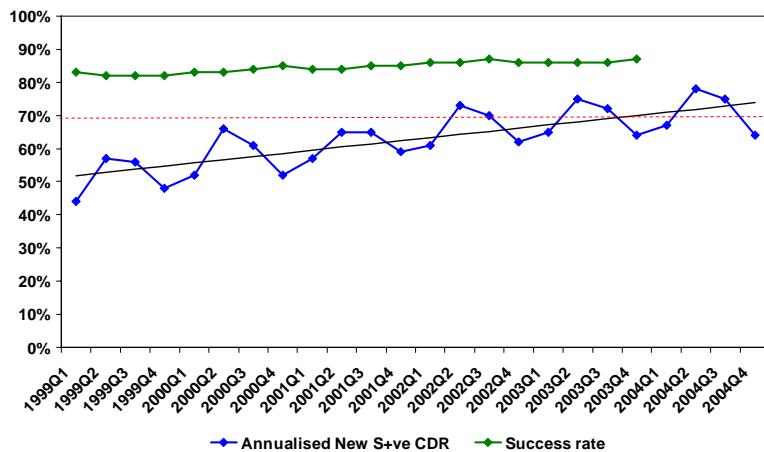

* 2004 projected population based on 2001 census.

Population in India covered under DOTS and total tuberculosis patients put on treatment each quarter

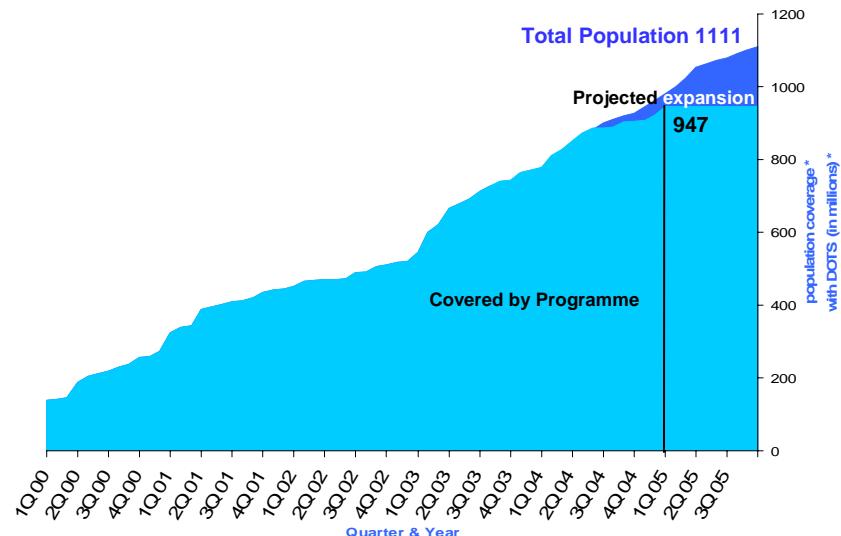

Annualized new smear-positive case detection rate and treatment success rate in DOTS areas, 1999-2004 *

*Estimated no. of NSP cases - 75/100,000 population per year (based on recent ARTI report)

Multiyear DOTS expansion plan for India 31st December 2004

DOTS Expansion and other Achievements in the 4th quarter 2004

Dear Colleagues,

RNTCP now covers 87% (947 million) of the India's population, and it is planned that the entire country will be covered by June 2005. In the fourth quarter of 2004, RNTCP coverage has increased from 906 million to 947 million – an addition of 41 million. And there has been increase in coverage of 169 million in the year, i.e. from 778 million in December 2003 to 947 million in December 2004. By the end of 2004, twenty six States and Union Territories were fully covered under RNTCP.

Performance

The overall performance of the programme at the national level has continued to be good, and has shown an upward trend in many states and districts. The case detection rate for the 4th quarter of 2004 was 64%, with a total of 288,102 patients being placed on treatment. The success rate amongst the new smear positive PTB cases registered in the 4th quarter of 2003 was 87 %. The sputum conversion rate and cure among the new sputum positives was 90% and 85% respectively.

In the fourth quarter 2004, 94,407 new smear negative cases and 34,362 extra pulmonary cases were also initiated on treatment. The number of smear positive re-treatment cases in the quarter was 36,649. The extra-pulmonary TB cases accounted for 14% of all new cases in the quarter and re-treatment cases for 25% of all smear positive cases in the 4th quarter.

In the year 2004, about 12 lakh patients were placed on RNTCP treatment - almost one lakh per month. In the year, a total of 4,65,331 new smear positive PTB, 3,81,381 new smear negative PTB and 1,44,375 new extra pulmonary patients were registered under RNTCP. The cure rate for the 2003 annual cohort of NSP cases was 85% and the NSP case detection stood at 72% for the year 2004.

Supervision and Monitoring

A supervision and monitoring strategy with specific indicators to further improve the performance of RNTCP has been finalized and will be implemented across the whole programme in 2005. The updated reporting formats will be used to report on the 1st quarter 2005 cohort.

Web-based Resource Centre for IEC

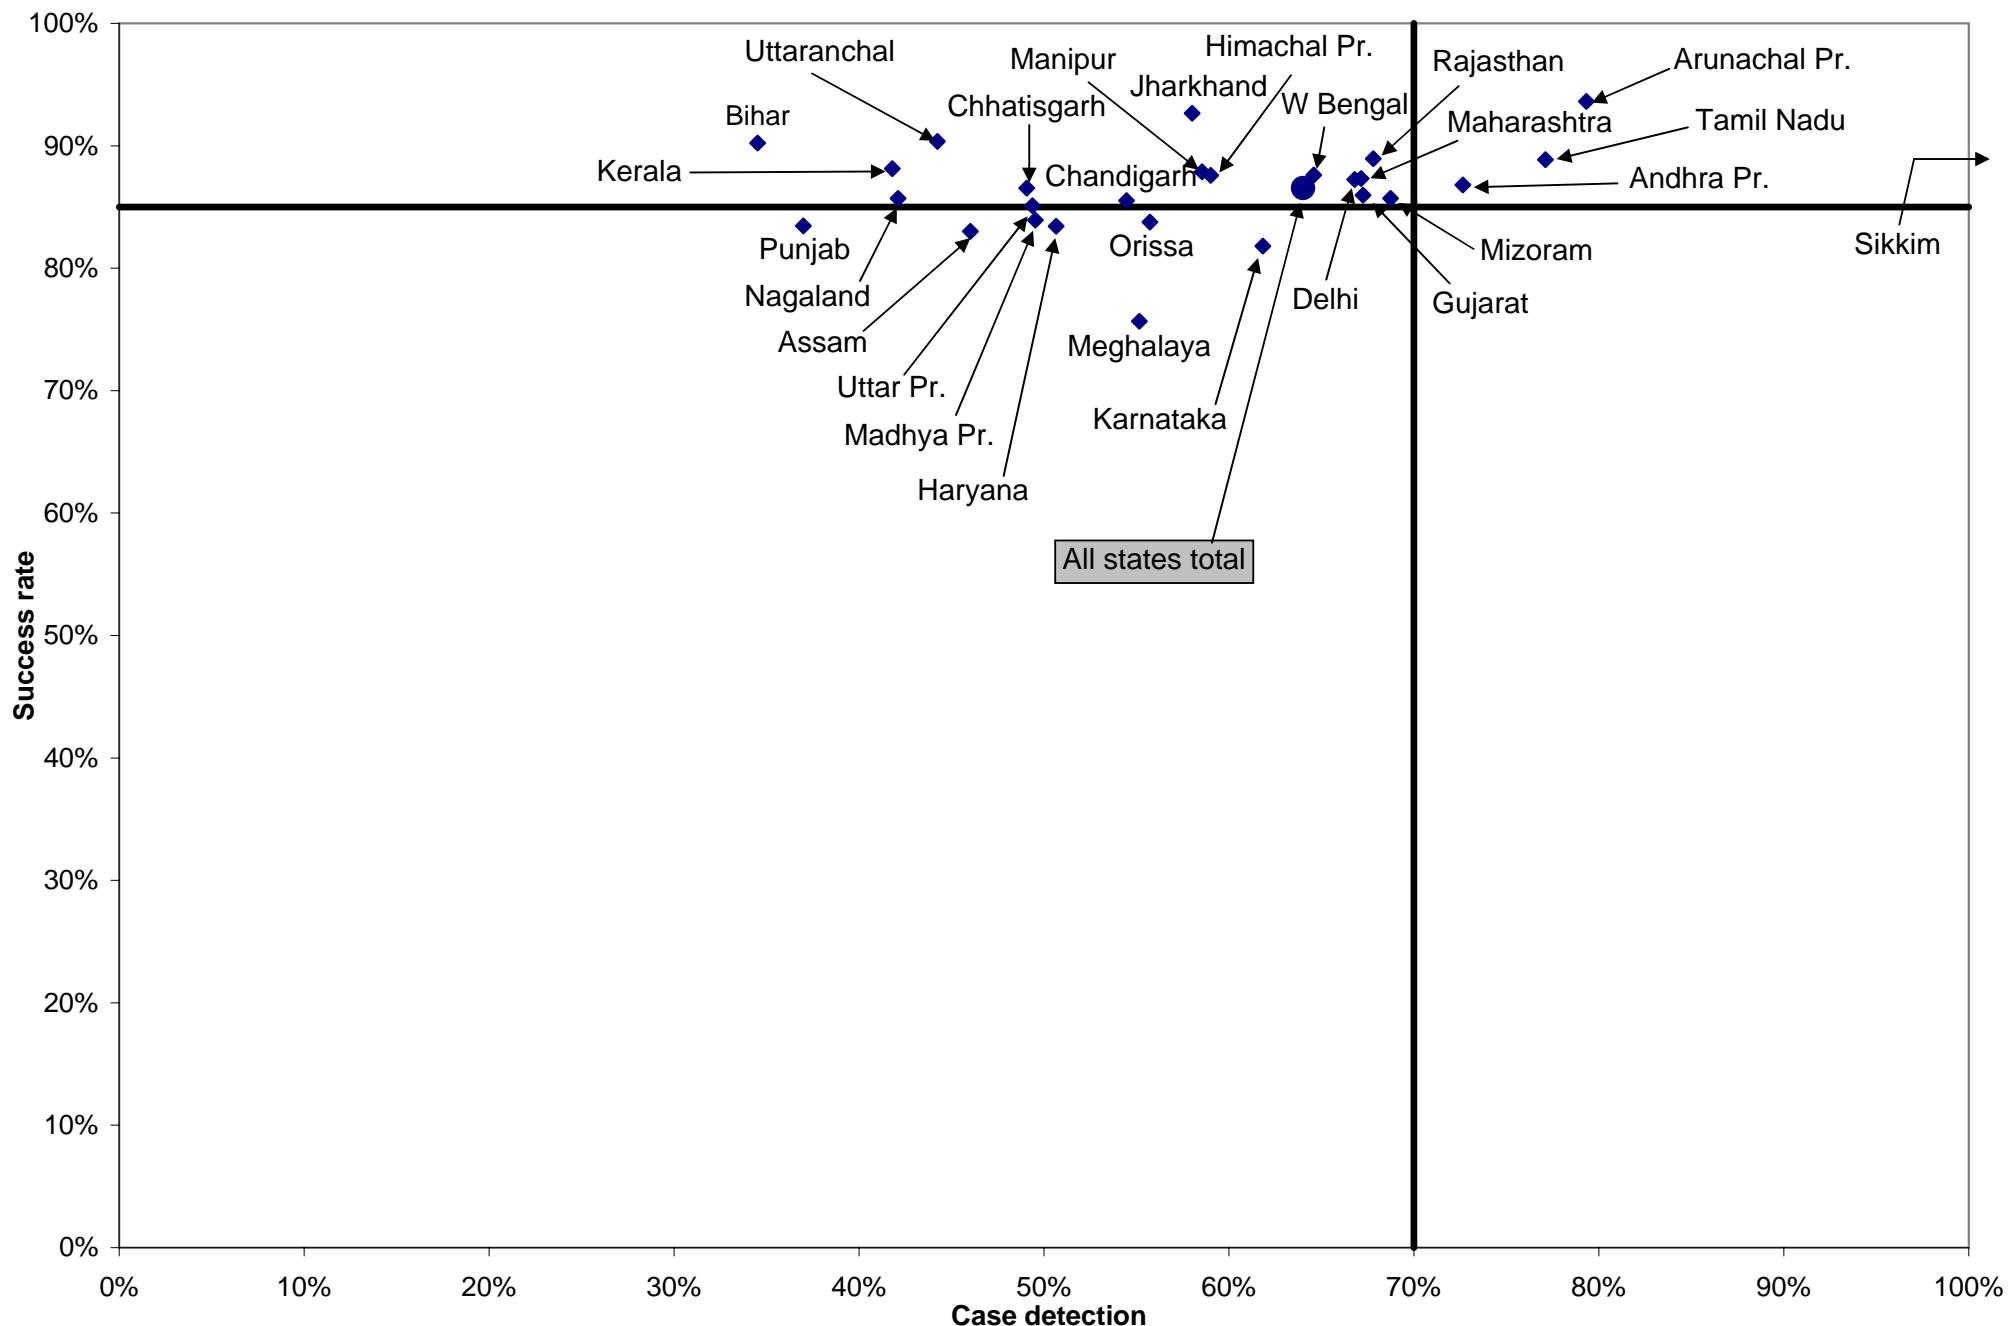

A web-based resource centre for IEC material on the RNTCP official web site: www.tbcindia.org was formally launched by the Honourable Minister of Health and Family Welfare on 16th December 2004

The performance of RNTCP during the fourth quarter 2004 and during the year 2004 has been very encouraging. During the year, almost 1.2 million patients have been initiated on treatment. The finalization of the supervision and monitoring strategy with relevant indicators to improve the performance of RNTCP, the consensus statement on the management of Pediatric TB, the development of the web-based resource centre for IEC material, and the holding of the 2nd Stop TB Partners Forum in Delhi in March 2004, are all testimony to the achievements India has made in DOTS expansion.

The progress of RNTCP and the international recognition of its achievements, gives us all reason to feel proud. However the challenging tasks of covering the entire country under DOTS during 2005 and also maintaining the quality of services remain. We are well aware of the enormity of these challenges, but at the same time, are immensely proud of our dedicated teams working in the field. We are confident in reaching our targets, with regular and intensive monitoring and supervision, collaboration with other sectors, and your cooperation.

Dr. L. S Chauhan, DDG (TB)
Directorate General of Health Services, MOHFW

Case-detection and treatment success rates in RNTCP areas for fourth quarter 2004/2003

NR - Not reported till 10th February 2005; Values for grey areas are not expected

* Projected population based on census population of 2001 is used for calculation of case-detection rate. 1 lakh = 100,000 population

Estimated New Smear Positive cases / lakh population based on ARTI data for North Zone (Chandigarh, Delhi, Haryana, Himachal Pradesh, Jammu & Kashmir, Punjab, Uttar Pradesh, Uttarakhand) is 95; East Zone (Andaman & Nicobar, Arunachal Pradesh, Assam, Bihar, Jharkhand, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim, Tripura, West Bengal) is 75; South Zone (Andhra Pradesh, Karnataka, Kerala, Lakshdweep, Pondicherry, Tamil Nadu) is 75 and West Zone (Chhattisgarh, Dadra & Nagar Haveli, Daman & Diu, Goa, Gujarat, Madhya Pradesh, Maharashtra, Rajasthan) is 80; Orissa is 85

§ Smear conversion rate not expected for states that began implementing RNTCP during 4th quarter 2004

¶ Cure rate and success rate are not expected for states that began implementing RNTCP after 4th quarter of 2003

New Smear Positive Case Detection Rate of India

Fourth quarter, 2004

Cure rate by district, India

Fourth quarter, 2003
