

RNTCP Performance Report, India Third Quarter, 2006

Population in India covered under DOTS and total tuberculosis patients put on treatment each quarter

Annualized new smear-positive case detection rate and treatment success rate in DOTS areas, 1999-2006 *

*Estimated no. of NSP cases - 75/100,000 population per year (based on recent ARTI report)

Revised National Tuberculosis Control Programme **Pursuing High quality DOTS services**

Dear Colleagues,

RNTCP performance at the national level has been overall satisfactory. The case detection rate for the 3rd quarter 2006 was 69% with a total of 361,954 patients placed on treatment. The success rate amongst the new smear positive PTB cases registered in the 3rd quarter 2005 was 85%. The sputum conversion rate and cure rate among the new sputum positive cases was 88% and 83% respectively.

Over 1,600,000 suspects were examined during the quarter and 215,809 sputum positive cases were diagnosed. In addition to the 143,349 new smear positive cases, 103,716 new smear negative cases, 46,358 extra pulmonary cases, 50,585 smear positive re-treatment cases and 19,469 ‘Others’ were also initiated on treatment in this quarter.

Analysis of state wise performance, indicate that 24 states have recorded an improvement in their new smear positive case detection in the current quarter compared to their performance in 3rd quarter of 2005. Significant improvements in NSP case detection rates have been noted in states of Jharkhand (22%), Assam (11%), Bihar (6%), Chhattisgarh (4%), Goa (11%), Manipur (18%), Nagaland (18%), Punjab (9%), Tripura (19%), and Uttar Pradesh (5%). Improvement in performance could be attributed to the regular monitoring by the centre and translated into improved field supervision by the State and District programme officers. States/UTs like Andhra Pradesh, Gujarat, Delhi, Chandigarh, Himachal Pradesh, Pondicherry, Sikkim, Rajasthan and West Bengal have already achieved the benchmark and consistently performing over and above the global targets of CDR and treatment success rate. Efforts should be made to try and identify underserved geographical areas and vulnerable groups like tribal areas/ desert areas/ urban poor/ and address gender differentials in seeking health care. Efforts should be directed to improve access to each and every TB patient in the community.

Other Initiatives:

Biannual State TB Officers and WHO RNTCP Consultants meeting was organized in the month of July (South zone-Chennai) and August (North zone- Surajkund) to review the performance and programme related issues in the states.

TB-HIV Review meeting at Chennai was chaired by Additional Secretary, GoI and AS & DG (NACO), wherein the TB-HIV coordination activities in the six high prevalence states were reviewed. In addition, operational issues related to TB-HIV collaborative activities being faced in the field were deliberated upon.

8th Lab Committee meeting: The committee reviewed the ongoing activities in the states for establishment of Intermediate Reference laboratories and their accreditation. The process for accreditation of IRLs and rolling out of DOTS plus in the state of Gujarat and Maharashtra were also discussed.

Training on drugs and logistic management was organized in Lucknow on 20th-21st July 2006 to build the capacity of the district staff in efficient drug and logistic management.

Meeting of the expert committee to plan for the upcoming National Annual Risk of Tuberculous Infection (ARTI) survey was organized at NTI, on the 28th-29th July 2006. The survey is planned between 2007-09.

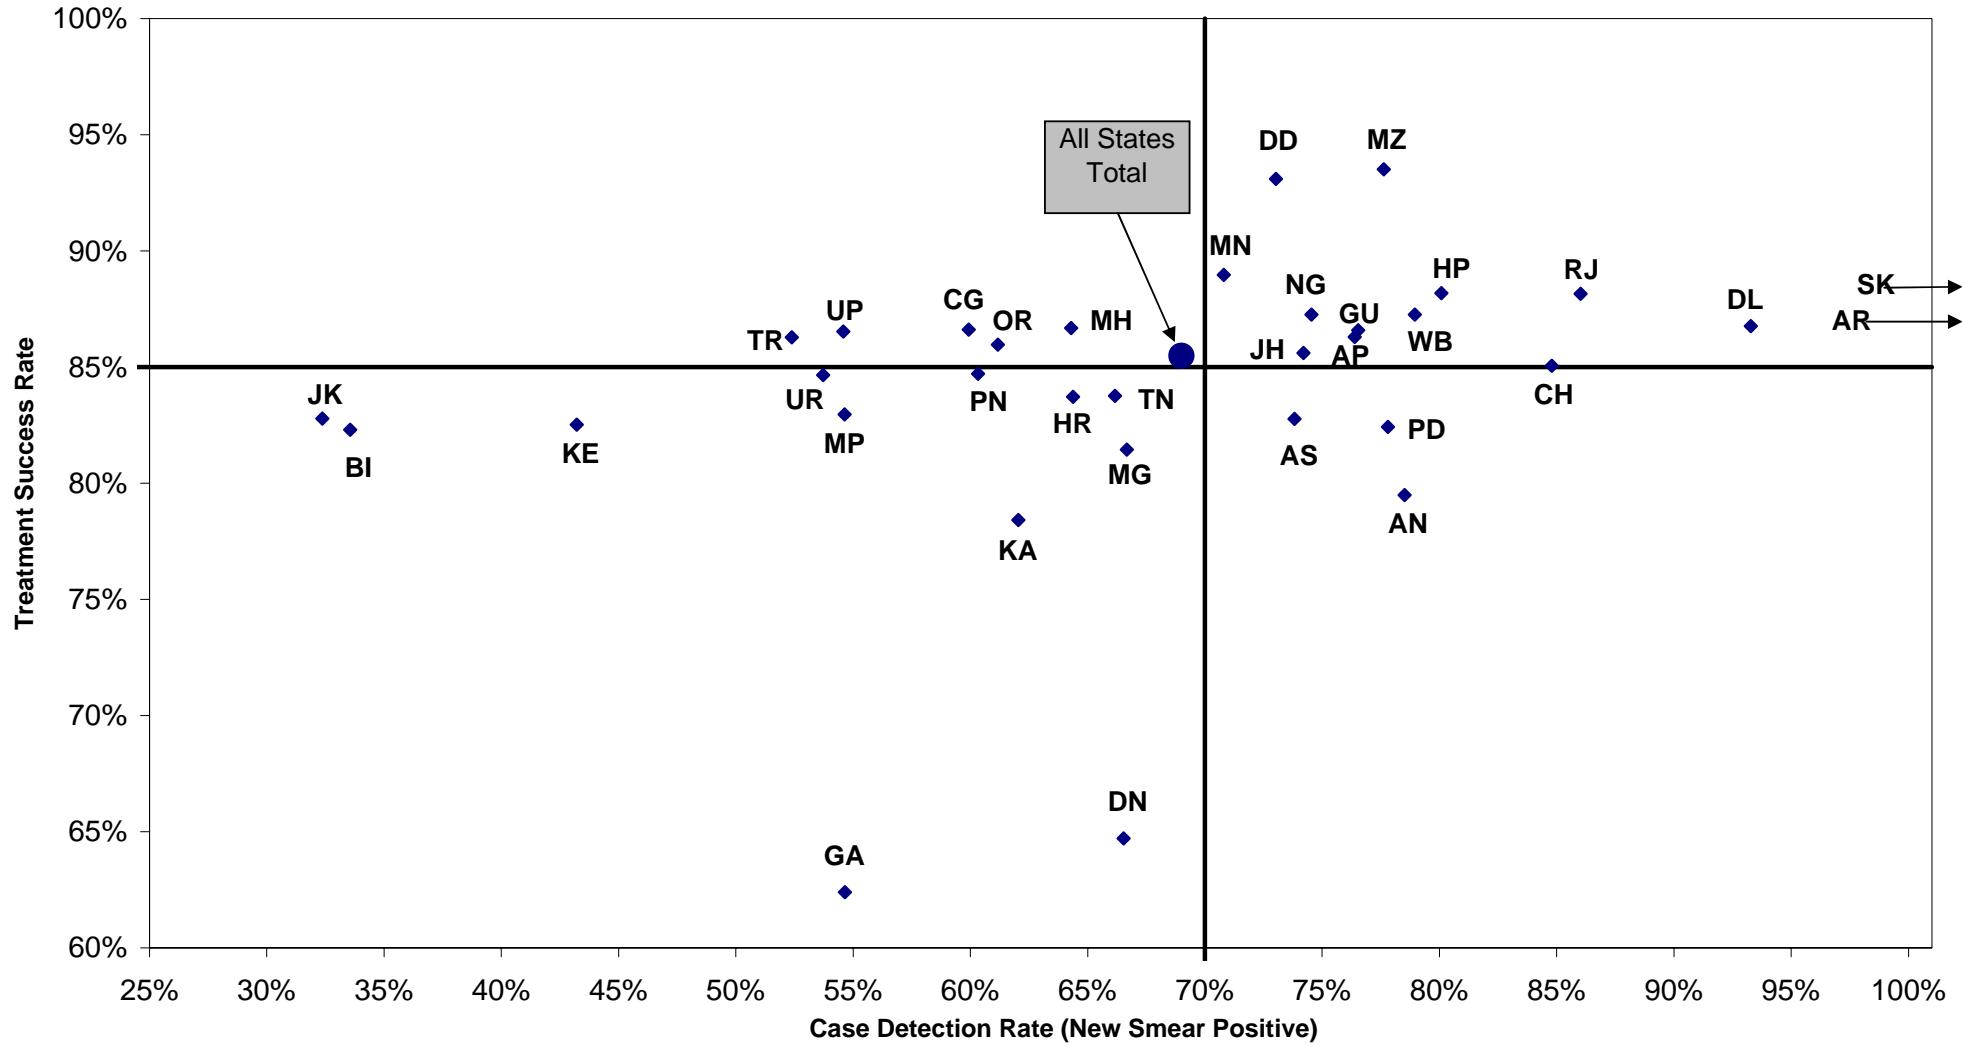

National level RNTCP sensitization workshop for IMA was organized on 13th-14th Aug 2006 at Surajkund. All state IMA President's had attended the meeting and provided commitment for extending support to RNTCP activities in their respective states.

Sensitization workshop of all CGHS (Central Government Health Services) providers was completed during the quarter.

The programme is making all possible efforts at the central level to support the states to improve the quality of services in the field. These efforts need to be translated into actions in the field through positive commitment from all programme managers, and supportive supervision and monitoring of the STS, STLS, Lab technicians and all those working for the programme in the field. A sincere and committed team in the district is essential, and it is our responsibility to encourage and motivate them to strive for the noble cause of TB control.

Dr. L. S Chauhan,
Deputy Director General (TB)
Dte. G. H. Services, MOHFW
Government of India

Values for grey areas are not expected. NR - Not reported till 26th November 2006

Estimated New Smear Positive cases / lakh population based on ARTI data for North Zone (Chandigarh, Delhi, Haryana, Himachal Pradesh, Jammu & Kashmir, Punjab, Uttar Pradesh, Uttarakhand) is 95; East Zone (Andaman & Nicobar, Arunachal Pradesh, Assam, Bihar, Jharkhand, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim, Tripura, West Bengal) is 75; South Zone (Andhra Pradesh, Karnataka, Kerala, Lakshadweep, Pondicherry, Tamil Nadu) is 75 and West Zone (Chhattisgarh, Dadra & Nagar Haveli, Daman & Diu, Goa, Gujarat, Madhya Pradesh, Maharashtra, Rajasthan) is 80; Orissa is 85

1 Projected population based on census population of 2001 is used for calculation of case-detection rate. 1 lakh = 100,000 population

2 Smear positive patients diagnosed include new smear positive cases and smear positive retreatment cases

3 Total patients registered for treatment includes new sputum smear positive cases, new smear negative cases, new extra-pulmonary cases, smear positive retreatment cases and 'Others'
