Revised National Tuberculosis Control Programme
2nd Quarter 2010

Dear Colleagues,

It is my great pleasure to inform you that Revised National TB Control Programme has achieved NSP case detection rate of 79% and treatment success rate of 87% at the national level during the 2nd quarter, 2010. This quarter has seen one of the highest case detection rates at country level. The programme, while consolidating and sustaining its past achievements, is progressing well towards achieving the TB related Millennium Development Goals

RNTCP performance in 2nd quarter 2010

During the quarter, over 1.9 million TB suspects were examined, 258,813 sputum positive cases were diagnosed, and 416,738 TB cases were registered for treatment. The annualized total case detection rate is 142 cases per 100,000 populations. With a total of 173,770 new smear positive cases, being registered for treatment, the new smear positive TB case detection rate (annualized) for the 2nd quarter 2010 is 79%. In addition to this, 99,693 new smear negative cases, 65,238 new extra pulmonary cases, 54,308 smear positive re-treatment cases and 23,316 re-treatment Others' were also registered for treatment during the quarter. The treatment success rate amongst the new smear positive PTB cases, registered in the 2nd quarter 2009, is 87% and the sputum conversion rate of patients registered during 1Q10 is 90%. The default rates among NSP (5.7%), NSN (7.0%) and re-treatment cases (14.1%) continues to show the declining trend over the past several quarters

Major Activities during the quarter

Programme review

Joint Monitoring Review Mission: The programme was reviewed by a team of experts from World Bank, WHO, USAID, DFID, Global Fund, Clinton Foundation and Bill and Melinda Gates Foundation from May 17th to 28th with the principal objectives to review progress since the 2009 Joint Monitoring Mission with special emphasis on long term financing of RNTCP; procurement, distribution and quality assurance of anti-TB drugs; laboratory expansion for diagnosis/follow up of MDR-TB; MDR-TB treatment; human resource development; and innovations for TB prevention, diagnosis and treatment. The mission conducted detailed discussion at central TB Division, visited the states of Madhya Pradesh, Rajasthan, Kerala and provided useful recommendations in those thematic areas for the programme to consider.

RNTCP was reviewed in detail by Joint Secretary (PH) on 17th and 18th June 2010 with State TB Officers and RNTCP Consultants. The major thrust given in all this review is on the importance of universal access for TB care. Every TB patient in the country should have access to early case detection and standardized care in all health care facilities. Strategies for the universal access for TB care were developed in the meeting and are being implemented in all states.

Progress in accreditation of Intermediate Reference Laboratories (IRL)

The programme is in the process of establishing a network of about 43 accredited Culture and Drug Susceptibility testing (DST) Laboratories across the country in a phased manner for diagnosis and follow-up of MDR TB patients. The State Culture & DST Labs at Gujarat, Maharashtra, Andhra Pradesh, Delhi, Kerala, Tamil Nadu, Rajasthan, West Bengal, Orissa and Jharkhand have been accredited. State C&DST Labs of Haryana and UP are in the advanced stages of proficiency testing and the labs of other states are under various stages of the accreditation process. To supplement and support the state lab network the programme is also involving mycobacteriology laboratories of Government Medical Colleges as well laboratories in the NGO and Private Sector. Till date, four labs in other sectors (CMC-Vellore, PD Hinduja Hospital –Mumbai, BPRC-Hyderabad and SMS Jaipur) have been accredited and about 11 such labs have applied for accreditation. Apart from these four Govt medical college laboratories are also in the accreditation process, AIIMS New Delhi, KGMU Lucknow, and PGI Chandigarh.

Progress in the DOTS- Plus services for MDR TB cases.

DOTS Plus services for management of MDR-TB are now available in 125 districts covering a population of 260 million in 10 states. Till date a total of around 2300 MDR-TB patients are on treatment in these states. Other states are in various stages of preparatory activities for rolling out DOTS-Plus services.

Progress in TB-HIV Collaborative Activities.

There has been continued progress in the expansion of TB/HIV collaborative activities. Intensified TB/HIV package of services was launched in the States of Haryana, Madhya Pradesh, Himachal Pradesh and Uttarakhand & training of master trainers has been completed. A National review of State TB Officers was conducted in the month of June in which TB/HIV activities were reviewed in detail. Among the states in which Intensified TB/HIV package was launched in 2009. Punjab, Chandigarh, Assam, West Bengal and Kerala have started reports from 2q10. An operational research has been initiated to assess the quality of HIV care among HIV-infected TB patients in the state of Karnataka.

Progress in procurement and drug logistics management

Consultant (Procurement), CTD provided training on the “Decentralized Procurement under RNTCP-II” to all the concerned officials of the state and all the DTOs of Maharashtra at Pune on 19th May, 2010 and conducted Post Procurement review at State and District TB Cell of Pune, Maharashtra from 20th – 21st May, 2010. A training session on “Decentralized procurement in RNTCP II – by States and districts” was conducted by CMO (TB) for all the State TB Officers at the National Review meeting of STOs and Hqrs. Consultants on 18th June, 2010 at LRS Institute, New Delhi.

Air-borne infection Control

RNTCP has facilitated in drafting National Guidelines for Air-borne infection control and is piloting in three states, West Bengal, Gujarat and Andhra Pradesh. In this quarter, air-borne infection risk assessment visits were conducted in 11 facilities in West Bengal and 9 facilities in Gujarat and air-borne infection control capacity building workshop was conducted in Andhra Pradesh.

Progress in Partnerships:

CBCI launched the Global fund RCC project in an additional 8 states thus expanding the project from 11 to 19 states and similarly IMA has also expanded the project to 16 states.

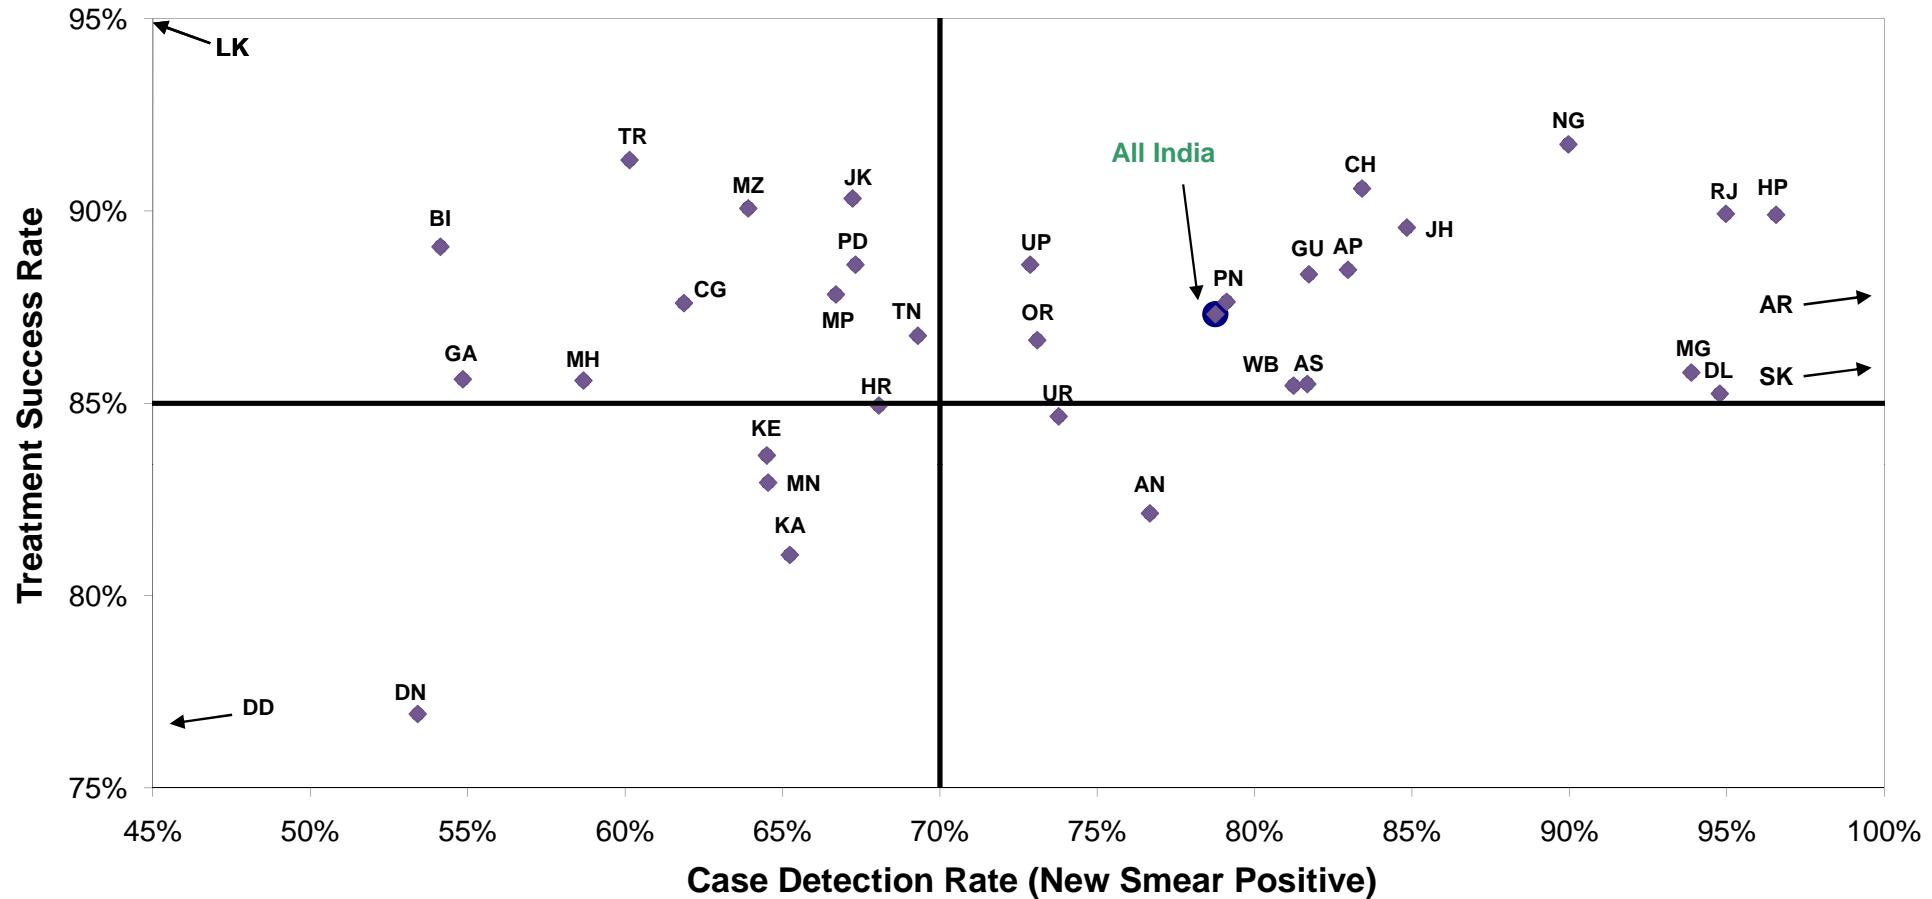

The Federation of Family Physicians Association of India (FFPAI), a member of Indian Medical Professional Associations Coalition against TB (IMPACT), convened a meeting in Mumbai on 3-4th April 2010 to strengthen the role of Family Physician associations in their fight against Tuberculosis. It also provided a forum for advocating the endorsement of the ISTC among the family physicians.

The Confederation of Indian Industry (CII) conducted a Northern Regional Conference on “TB Management at Workplace and Beyond” on 11th June at Chandigarh for the states of Punjab, Chandigarh, Haryana and Himachal Pradesh. The consultations provided an opportunity to discuss the workplace interventions under RNTCP.

RNTCP has made substantial contribution to decrease the prevalence and mortality due to TB. However we need to take up newer challenges and one important challenge is to ensure that all TB patients in the community have access for early, quality diagnosis and treatment services so that TB patients can be diagnosed early and treated properly with a view to cut the transmission of infection. We have to strive hard to reach the marginalized groups such as migrants, alcohol and other drug users, drug resistant TB etc. Intensive case finding efforts are required among high risk groups such as contacts of smear positive TB cases, people living with HIV, Diabetes, smokers etc. Active involvement of all health care providers, civil society partners and community leaders in TB control efforts are needed for achieving our vision of a TB free country.
